Freelance   Nov 2019 – now
Software Engineer/Consultant   Kyiv, Ukraine (remote)

Working with several clients, mostly with ex-colleagues: Lilt, LemonOne, Mocentiv – all are startups.

Lilt   Apr 2019 – Nov 2019 (8 months)
Senior Frontend Developer   Berlin, Germany

Working on the improvements in the flagship web app, helping to finalize long-lived development streams.

Careem   Nov 2017 – Mar 2019 (1 year 5 months)
Senior Web Developer   Berlin, Germany

Played a key role in creating a library of shared cross-project React UI components, worked on code infrastructure (TypeScript, linting, unit tests, cross-framework integrations) and implementation. Helped to define the company's front-end development culture, interviewed candidates, and created interview specs.

Helped to architecture and implement from scratch a desktop web SPA for corporate clients. Lead an initiative to extract essential modules into standalone packages, to be used as a base for other applications. [Webpack, Jest, PostCSS, Yarn, Jenkins, Docker, Lerna, React, Redux]

GoEuro (Omio)   Jul 2017 – Nov 2017 (5 months)
Senior Front-End Developer   Berlin, Germany

Worked on new features and contributed to the structural refactoring of mobile/desktop search results SPAs, helped to prepare the code base for rapid development iterations. Helped to drive company-wide initiative of sharing UI components among teams and projects. [React, Angular1, Redux, Immutable.js]

Prolog Development Center   Sep 2015 – Sep 2016 (1 year 1 month)
Senior/Lead Front-End Developer   Copenhagen Area, Denmark

Assisted in the development of airport passenger flow prediction app, built with the in-house UI constructor.

Planned and executed the makeover of the company's flagship mobile application. Transitioned the existing app logic to React/Flux; led a team of 5 to release the first version 1 month before the deadline.

Prolog Development Center   Feb 2013 – Aug 2015 (2 years 7 months)
Front-End Developer   Kyiv, Ukraine (remote)

Was responsible for architecture and implementation of front-end solutions. Implemented several SPAs [CoffeeScript, Backbone, Handlebars, Require, SASS] and a mobile app [PhoneGap, TypeScript, Flux, React], worked on Travis CI automation. Designed and implemented a UI constructor, guided a team of developers who built modules for it [Flux, React, TypeScript, Webpack].

oDesk Freelance   Dec 2011 – Jan 2013 (1 year 1 month)
Software Engineer   Kyiv, Ukraine (remote)

Education

Bachelor of Science, 2011 – applied mathematics, operations research
Taras Shevchenko National University of Kyiv

A story. Originally a freelancer, joined a Danish start-up *Ovivo* [1]. *Prolog Development Center* [2] bought them. Inside PDC I helped to establish modern front-end development practices, worked directly with CTO. After almost 3 years of fruitful collaboration, I moved to Denmark. After that, I took a 9-month sabbatical and moved to Berlin to work at *GoEuro* [3]. Then joined promising Dubai-based ride-hailing start-up *Careem* [4], which was later acquired by *Uber*. Next, decided to look for a smaller company, and joined *Lilt* [5]. Right now I'm back to freelance work, as this is what I enjoy the most.
